2. Miscellaneous

2.1. **Oi Group and its Operations.** Oi Group started its operations with the provision of fixed telephony services, but, throughout the years, by keeping up with the technological cycles and the market demand, it expanded its operation also to mobile telephony, Internet, and pay television areas, among others.

Currently, the Debtors provide telecommunication services in an integrated manner and under the same brand – “Oi” –, offering a variety of converging products, for both fixed and mobile telephony. Today, Oi Group is the largest fixed telephony service provider in Brazil (and one of the largest in Latin America), with 13.4 million lines in operation, which represents a market share of 34.1% of the total market of the country, servicing homes, companies, and telephony for public use. In addition, it is one of the largest conglomerates in the segment of mobile telephony, with a market share of 17.4% in this sector.

Oi Group’s operations also cover fixed and mobile broadband services, Wi-Fi, TV, and public telephony, considering that its supply of converging and integrated services has shown to be successful and necessary, as it helps increase user loyalty.

Oi Group also provides data communication and telephony services on an exclusive basis to 100% of the army sites located in Brazil’s dry border, in addition to operating Comandante Ferraz station’s telecommunications system, in the Antarctic, in partnership with the Ministry of Navy.

The social relevance of Oi Group is reflected in the expressive figures associated with tax revenue and the generation of employment; between 2013 and 2016 alone, Oi Group paid approximately BRL 34 billion to the public treasure in taxes, and currently relies on more than 131.3 thousand direct and indirect job slots in Brazil. Also, Oi Group (i) is engaging in social projects and initiatives, such as “Oi Futuro”, a social responsibility institute created in 2001 that includes projects in the segments of education, sustainability, sports, and culture, as well as (ii) participates in the conduction of public policies, such as the National Broadband Plan and Broadband in Schools.

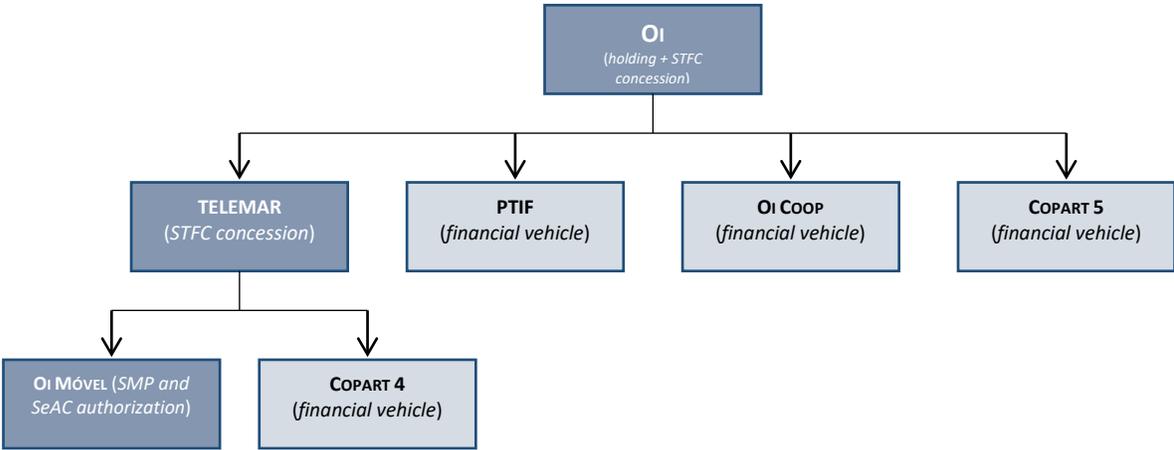

In addition, Oi Group enables the electronic counting of votes in local and state elections occurred in the country, and thus makes possible the integration between the information obtained from 2,113 electoral districts and 12,244 electoral sections of the Regional Electoral Courts, which enables the transmission of this information to the Superior Electoral Court.

Oi Group’s operations are concentrated in Regions I, II, and III of the General Plan of

Concessions (described in the initial petition of the Judicial Reorganization), and all telecommunication services provided depend on the prior concession of ANATEL, whether by means of grants, authorizations, licenses, or registrations.

In brief, Oi Group is one of the largest corporate conglomerates in the country, and is present in all 5,570 Brazilian cities, servicing more than 63 million clients. Within this context, the importance of Oi Group is unquestionable, not only to the Brazilian telecommunications system, but also and especially to the nationwide population, and therefore its uplift and recovery are crucial.

2.2. Oi Group’s Structure. The corporate structure of Oi Group is represented in the organizational chart below:

As highlighted in the initial petition of the Judicial Reorganization, the activities of Oi Group are developed in a coordinated manner and under the corporate, operational, financial, administrative, and managerial single control of OI, which acts as a holding entity (in addition to being the holder of the concession of the “Commutated Fixed Telephone Service” – STFC [*Serviço Telefônico Fixo Comutado*] in Region II) of the group and whose shares are listed in the B3 and in the NYSE (in the latter case, with negotiation in the ADR format).

OI MÓVEL and COPART 4 are subsidiaries wholly owned by TELEMAR, which in turn is a subsidiary wholly owned by the controller OI, as well as PTIF, OI COOP, AND

COPART 5.

Fixed telephony operations are performed by TELEMAR, the concessionaire of the public service in point, while the provision of the cable TV services is the responsibility of OI MÓVEL, which is also the holder of the authorization to operate mobile telephony services.

PTIF, OI COOP, COPART 4, and COPART 5 are Oi Group's investment companies. The first two entities, existing and organized under the Laws of the Netherlands, are mere financial vehicles of Oi Group, organized to obtain funds in the international market, which are intended, through loans, for the funding of activities in Oi Group's operating companies in Brazil, considering that this structure is regularly used by several Brazilian conglomerates. Whereas the latter two are the owners of some of the main properties leased for Oi Group in the State of Rio de Janeiro.

2.3. Reasons for the Crisis. The current financial situation of Oi Group is a result of several factors. The retention of a large amount of funds in court deposits arising from discussions within the regulatory, labor, tax, and civil scope, with immediate impact on the liquidity of Oi Group, as well as with the imposition of high administrative fines, particularly by ANATEL, has contributed to the worsening of Oi Group's financial situation.

The change in the standards of consumption of telecommunication services, due to the technological evolution, worsened this scenario of financial difficulties even more. With the mass supply of mobile telephony, cable TV and Internet services, the attractiveness of fixed telephony services was reduced, which resulted in a decrease in the base of subscribers of Oi Group in this segment.

Notwithstanding the foregoing, the level of the objectives and goals associated with the obligations of universalization of fixed telephony services (consolidated in the General Plan of Universalization Goals, as provided for in the General Telecommunications Law) has remained stable since 1998, the year on which the concession agreements in effect were signed. Therefore, within the context of the referred obligations of universalization, Oi Group finds itself forced to make heavy investments in certain

regions and remote locations, with low demographic density and a low-income population, obtaining, as a compensation, a small financial return as compared with the regulatory requirement of these investments.

Numbers regarding public telephones (popularly known as “*orelhões*”, “big ears”, in English) are an example of this lack of proportion between the obligations imposed to the Debtors within the scope of the universalization requirements *vis-à-vis* its financial compensation: currently, Oi Group operates approximately six hundred and forty-one thousand (641,000) public telephones across Brazil (with the exception of São Paulo), at an annual cost of approximately one hundred eighty million Reais (BRL 180,000,000.00), while the annual revenue generated by these public telephones is only two million seven hundred thousand Reais (BRL 2,700,000.00) in 2016 (considering that a reduction of more than 90% was verified between 2009 and 2016).

In addition, the costs to obtain funds incurred by Oi Group – taking into account the high interest rates adopted nationwide, as well as the need for and cost of foreign exchange protection for funds obtained abroad – are higher than the costs to obtain funds incurred by its direct competitors, who are international players, which also contributed to the deterioration of Oi Group’s financial situation.

On the other hand, it is notable that the Country’s economic scenario has been deteriorating over the past years, thus directly impacting the operations performed by Oi Group and negatively affecting its liquidity. Moreover, the profile of the market covered by fixed telephony concessionaires competing with the Debtors is more homogeneous and the economic power of their users is materially higher than that of those covered by Oi Group in its area of activity (larger and more heterogeneous than the area of activity of its competitors).

The combination of these factors prevented compliance with several obligations, primarily those assumed by reason of operations involving financial loans and fund raising through the issuance of bonds and debentures, which balances represent the majority of Oi Group’s current indebtedness, which gave rise to the request for Judicial Reorganization.

2.4. Previous Measures Adopted. Since the first signs of deterioration of its financial health, Oi Group has been collaborating with external financial and legal advisors, in Brazil and abroad, to help it in the negotiation process with creditors and in the assessment of feasible alternatives for its reorganization.

Over the past quarters, Oi Group has been implementing an internal restructuring project – referred to as “Transformation Plan” – comprising more than three hundred and seventy (370) initiatives, considering that the great majority of them have already been executed or are in the process of execution, which, in general terms, intends to increase its competitiveness in the market, improve productivity, and reduce costs and expenses, increase operational efficiency, and improve the quality of the services.

As a result, we could highlight the following in this period: (i) the launchings of innovative plans, such as Oi Livre in mobile telephony and Oi Total Play in the residential segment; (ii) the significant improvement of operational indicators, such as, for instance, the thirty-three point three percent (33.3%) reduction in the average time to solve defects and the thirty-one point three percent (31.3%) reduction in the average time to install services, both during the second quarter of 2017, in relation to the second quarter of 2016; (iii) the reduction of BRL one billion and two hundred million Reais (BRL 1,200,000,000.00) in costs and expenses in the first six months of 2017 in relation to the same period in 2016 and (iv) the improvement in several quality indicators, such as the twenty-eight point six percent (28.6%) reduction in incoming complaints at ANATEL, the twenty-one point six percent (21.6%) reduction in incoming complaints at Procon, and the fifty-eight point seven percent (58.7%) reduction in the filing of complaint actions in the Special Civil Court (JEC - *Juizado Especial Cível*), all in the second quarter of 2017 in relation to the second quarter of 2016.

2.5. Reasons for the Joint Plan. Oi Group consists of companies that, under Oi’s common control, have a relevant economic and operational interconnection resulting especially from the interdependence and complementariness of the activities and services they provide, in addition to the management of the companies’ funds to the benefit of the common interest.

Oi Group's managerial, administrative, and financial decisions are made by the controlling company, OI. On the other hand, Oi Group's internal and corporate processes and organization are also integrated and fully unified.

In addition to this single and consolidated direction of the converging and integrated activities, and to the direct operational and commercial bond, the Debtors have a strict economic and financial relationship strongly interconnected among themselves, by virtue of agreements, guarantees, and obligations that bind them and make them financially dependent on one another.

The Debtors are parties to several intercompany loan agreements executed due to the management of Oi Group's funds for the sake of the common interest. Furthermore, there are several debt agreements executed by Oi, Telemar, and Oi Móvel with financial institutions, in addition to several guarantees granted by one of the group's companies in favor of the other. Among the transactions that demonstrate the Debtors' economic and financial connection, we highlight: (i) the issuance of bonds in the international market by PTIF and Oi Coop, and Oi appears as full guarantor in such transactions, as well as the issuance of bonds, by Oi, in the international market, with Telemar appearing as guarantor of some series of such bonds; and (ii) the issuance of real estate Credit Bills, by COPART 4 and COPART 5, backed by the receivables corresponding to the rent amounts of real estates leased to Oi and Telemar, with Oi appearing as debtor and Telemar as guarantor in the agreement executed by COPART 5.

Furthermore, the operation center where the remote monitoring of the entire network of Oi Group is made is located in properties owned by COPART 4 and COPART 5, and leased to Oi Group.

From a commercial and operational point of view, Oi, Telemar, and Oi Móvel share the same physical and logistic infrastructure, and use "multi-service" networks through which communications and data related to different concessions of Oi Group travel (fixed and mobile telephony, Internet, and TV signal). This business model – which consists of a consolidated practice in the telecommunications sector – enables Oi Group to offer and sell several integrated package plans that include converging services under the single "Oi" brand, which encourages the loyalty of users, reduces the rate of

discontinuation of consumers with respect to each one of the services contracted, and enables competition between Oi Group and the other operators of telecommunication services. Therefore, a significant part of the operating assets is intended for the provision of varied services, which would render unfeasible an eventual separation according to the owning company.

Therefore, considering the business model adopted by Oi Group, with integration and convergence in the provision of telecommunication services, the many cross guarantees and the consolidation of the corporate, operational, financial, administrative, and managerial control at OI, the solution of the economic and financial crisis must occur in a joint and consolidated manner, under penalty of risking Oi Group's restructuring process, which plays a crucial social role, to the evident detriment of the Creditors and other holders of interest (including those of social nature) that surround them, all interested in the resolution of the present situation (government, investors, financial institutions, employees, suppliers, consumers, etc.).

Assuming that some of the entities in Oi Group could not be the subject matter of reorganization, while others are under reorganization, implies ignoring the damaging consequence that would oppose to the remaining activity, in light of the legal and practical complexities that the lack of success of one of the companies could create, as the uplift of an entity in Oi Group depends on the reorganization of the entire group in conjunction, as provided for in this Plan and in the initial petition of the Judicial Reorganization.

2.6. Economic, Financial, and Operational Feasibility of Oi Group.

Notwithstanding the difficulties and factors that affect Oi Group, giving rise to the request for Judicial Reorganization, the current financial situation is temporary and transitory, considering that Oi Group is in a position to revert it, taking into account its economic magnitude.

The activities performed by the Debtors are profitable and feasible, and generate for Oi Group, in 2016, a gross revenue in the amount of forty-five billion Reais (BRL 45,000,000,000.00) and a net revenue of approximately twenty-six billion Reais (BRL 26,000,000,000.00). In addition, recent events reinforce the conclusion drawn with

respect to the profitability of the activities of the Debtors and the feasibility of Oi Group. With the launching of the new “Oi” brand, to date, it was possible to verify (i) an increase in the sale of new “Oi Total” plans; (ii) a significant increase in the so-called RGU (revenue generating unit, equivalent to each service contracted); (iii) an increase in the operational efficiency; and (iv) a reduction in the service discontinuity rate.

Moreover, it is known that discussions between ANATEL and the Ministry of Communications are in an advanced stage with regard to changes in the regulatory environment, which can result in the transformation of the concessions into authorizations, as well as in the change in the legal system of the reversible assets, releasing the concessionaires from many of their obligations and making them more competitive in relation to their competitors operating under an authorization system. In fact, there are Legislative Bills in an advanced stage that are intended exactly to increase security in the change in the model, which will benefit all concessionaires, rather than only those linked to Oi Group. These changes will positively impact the Debtors’ situation, and therefore, they are also considered very important for the effective uplift of Oi Group, with the preservation of their corporate activities and, consequently, the maintenance of the source of production and employment, encouraging the company’s social function and stimulating economic activity, which are objectives expressly stated in the LFR and expressed in indelible clauses of the Brazilian Constitution.

The feasibility of the Plan and the measures provided for therein for the reorganization of Oi Group is attested and confirmed by the Reports, under the terms of art. 53, items II and III, of the LFR, which are included in **Exhibit 2.6** of this Plan.

3. Primary means of Reorganization

3.1. Overview. Oi Group proposes the adoption of the measures listed below as a means to overcome its current and temporary economic and financial crisis, which are detailed in the specific sections of this Plan, under the terms of the LFR and other applicable Laws:

with Post-Petition Credits whose holders wish to be subject to the effects of this Plan, under the terms of **Section 4** of this Plan. Pre-Petition Creditors will become creditors of debt instrument(s) issued by the Debtor that was its original debtor, except for: (i) Pre-Petition Credits regarding PTIF and Oi Coop, whose holders will become Oi's creditors; (ii) Pre-Petition Creditors of COPART 4, which will be merged into Telemar, as provided for in **Exhibit 6.1**, and of the Pre-Petition Creditors of COPART 5, which will be merged into Oi, as provided for in **Exhibit 6.1**, which will become Telemar's and Oi's creditors, respectively; and (iii) Pre-Petition Creditors that choose one of the payment options provided for in **Sections 4.3.3.3 or 4.3.3.4**, which will become Oi's creditors.

- 3.1.2. Disposal of Permanent Assets:** as a manner of obtaining funds, Oi Group can dispose of the assets included in the permanent (noncurrent) assets of the Debtors listed in **Exhibit 3.13**, as well as other movable or immovable assets included in its permanent assets, as per **Section 5.1** and art. 66 of the LFR., provided that possible requirements, authorizations or limitations that may be necessary are complied with, notably in regard to ANATEL.
- 3.1.4. Capital Increases:** Oi Group can prospect and adopt measures, including during the Judicial Reorganization, with the purpose of obtaining new funds under the terms of **Sections 3 and 5.4**, through the implementation of eventual capital increases to be approved on the terms of the respective bylaws of the companies of Oi Group, provided that it is in accordance with the provisions of this Plan and of arts. 67, 84, and 149 of the LFR, considering that, if obtained, the corresponding obligations will be of a post-petition nature, for the purposes of the provisions of the LFR.

3.1.5. Corporate Reorganization: Oi Group can make the Corporate Reorganization, under the terms of **Section 6** of this Plan, with the purpose of obtaining a more efficient structure that is appropriate to the implementation of the proposals provided for in this Plan and to the continuity of its activities, or any other corporate reorganization to be timely defined by the Debtors, provided that it does not cause a Material Adverse Effect on the companies included in Oi Group.

4.2. Secured Credits. Secured Credits will be paid as follows:

4.2.1. Grace Period: grace period of amortization of the principal of seventy-two (72) months, from the date of the Judicial Ratification of the Plan.

(i) interest and inflation adjustment incurred throughout the first four (4) years from the Judicial Ratification of the Plan will not be paid during this period, and will be capitalized on a yearly basis to the amount of the principal, so that the balance of the principal at the end of each year is the initial balance of the period added to the interest capitalized during the period in point, as per the following formula:

final balance of the period = initial balance of the period x $(1+t)^{DC/360}$,

where t represents the inflation adjustment and interest rate originally contracted and DC represents consecutive days; and

- (ii) as of the last Business Day of the fifty-fourth (54th) month from the Judicial Ratification of the Plan, the interest incurred on the new amount of the principal will be paid on a semi-annual basis, in national currency, until the full payment of the principal under the terms of this Plan.
